

SOLIDWOOD PROGRAM

The Biesse Solidwood program focuses primarily on CNC machining solutions for manufacturers of Solid Wood and Aluminum Extrusion Components.

Windows, doors, architectural elements, and millwork applications are just a few of the areas where Biesse supplies advanced technological manufacturing solutions.

With the largest range of CNC machines in the industry, coupled with the expertise of the Biesse America Solidwood team, Biesse has the right solution for the small shop as well as the highest production environments where 24/7 machining capacity is a requirement.

Biesse's advanced technology brings our customers great benefits in productivity, accuracy, quality output, flexibility, quick setup, and reduced labor. Windows, Doors, Boatbuilding, Outdoor furniture, Specialized Crating, RV Motorhomes, Aerospace, Butcher Blocks, Musical Instruments, Pattern and Moldmaking and Transportation, are just a few of the industries where Biesse CNC technology is the perfect match.

Why is Biesse Number One? It's simple. We have a professional, capable team and a superior product line that has a very attractive value-to-price ratio for our customers.

If it needs drilling, milling, shaping or sanding, contact Biesse.

BACCI

Founded in 1918, Paolino Bacci is one of the oldest and most respected woodworking machinery manufacturers in the world. Originally a manufacturer of classical woodworking machines, Bacci began to specialize in the production of machinery for the solid wood industry, chair manufacturing in particular, in the 1950's.

Today, Bacci is the world leader for CNC 5-axis machines for the chair and solid wood industry and offers advanced patented solutions for high production environments.

Bacci has developed a complete line of 5-axis, and higher, CNC Machining Centers, all equipped with the most advanced technical solutions and easy-to-use, yet extremely powerful, software. This line of equipment has wide range of applications which include solid wood, plastic, aluminum and composite materials.

With a wide range of customizable CNC Machining Centers that can be tailored to specific applications, Bacci stands unrivaled in the market.

TOOLING & ACCESSORIES

Biesse's Tooling and Accessories department offers a full line of tools, accessories and off-the-machine items to ensure the best performance from your machinery.

Central to the program are factory direct accessories, including MC aggregates for the Rover and Skill machines and clamps for work piece holding.

Across the total range of Biesse equipment, the department provides consumable items such as carbide tools, sanding belts and blades selected from suppliers proven to provide peak performance from your machinery.

SHOWROOMS

For over 40 years, continuous innovation has made Biesse one of the world's leading players in the manufacture and sale of high-tech machinery and systems for wood, glass, stone, plastics and other materials.

To serve our American and Canadian customers and showcase the industry's most advanced technology, Biesse offers four official showrooms throughout North America., including a location at the prestigious BCIT University.

Each showroom is equipped with the most current machinery on the market, offering visitors the opportunity to witness firsthand leading-edge wood, glass, stone and plastics fabrication technology.

Additionally, the showrooms offer clients the opportunity to Test Drive all technologies offered by Biesse, and Applications Engineers are available to assist customers with the Wood Industry's most sophisticated and comprehensive demonstrations in all of North America. Our mission is to work with clients to provide the best support and implementation practices for their production

As the site of training sessions, meetings, One2One events, numerous machines and software demonstrations annually, the showrooms are a hub of activity year-round. Visit us for a Test Drive , and learn how our technology can be your solution!
